Type of change	Classification of change ¹⁾	Product Category
Change of hardware	A	Communication

¹⁾ A: Stop of production or design change with influence of approval
B: Small change in design without influence of approval
C: No influence of product

Description of Change

UL and Lloyd's Register: Extension of the EDGE500IP's certification

Reasons for change

The market for UL- and Lloyd's Register-certified solutions represents an important and growing segment for our condition monitoring portfolio. With the COM465IP, we have already successfully served this market. The introduction of the EDGE500IP in August 2025 further strengthened our portfolio with a powerful and future-oriented solution.

To make the benefits of the EDGE500IP available to customers in these demanding markets as well, the required certifications were successfully obtained through accredited certification bodies following the product launch. As a result, the EDGE500IP is now also available for applications requiring UL and Lloyd's Register approvals, creating new opportunities for market expansion and future growth.

Key characteristics of change

The changes are limited to the enclosure laser marking and the available certification documents.

No other changes apply. Existing and planned projects can continue as scheduled without any modifications to planning or implementation.

Forecast key milestones

Time schedule	Current product	New product
Series	COMTRAXX / EDGE500IP	COMTRAXX / EDGE500IP
Product name	EDGE500IP	EDGE500IP
Manufacturer part number	B95061250	B95061250
First shipment	04.08.2025	21.09.2026
